Research at the Virginia Institute of Marine Science and the College of William and Mary's School of Marine Science at VIMS reveals the richness and delicacy of estuary and coastal-ocean ecosystems. While our education, research and advisory work has worldwide impact, it all starts right here in Chesapeake Bay and its watershed.

The Virginia Institute of Marine Science:

- Prepares graduate students for leadership roles in marine research, education and public policy nationally and internationally
- Provides science-based guidance and information to governments, industry and the public
- Generates knowledge to sustainably manage oysters, blue crabs, striped bass, tuna and other important marine species
